EDUCATION

POLITEHNICA UNIVERSITY OF BUCHAREST

- Faculty of Electronics, Telecommunications and Information Technology
- Bachelor's Degree – Microelectronics, Optoelectronics and Nanotechnologies (MON)
  2023 – Present | 3rd Year

SKILLS

- C / C++
- Python
- MATLAB
- SQL (MySQL)
- Cisco Packet Tracer
- OrCAD
- Electronic Circuit Design
- Verilog / Digital Design
- Assembly
- Linux

LANGUAGES

- English - B2 / C2
- Romania - Native

PROFILE

Third-year student at the Faculty of Electronics, Telecommunications and Information Technology, interested in networking, embedded systems, and digital circuits. I have completed the CCNA 1 course within the Cisco Networking Academy and I am about to start CCNA 2.
I have programming knowledge in C/C++, Python, and MATLAB, along with experience in academic projects such as network configuration in Cisco Packet Tracer and the development of hardware–software circuits and applications during university labs.

ACADEMIC PROJECTS

Database Project - MySQL

- Designed and implemented a relational database using MySQL
- Wrote SQL queries for data management and manipulation
- Developed a simple application for database interaction

CCNA 1 - Network Configuration Project (Cisco Networking Academy)

- Configured and simulated a network using Cisco Packet Tracer
- Performed IPv4 subnetting and configured routers and switches
- Tested connectivity and implemented basic security settings

Electronic Amplifier Design - OrCAD

- Designed and simulated an amplifier using OrCAD
- Analyzed circuit behavior and verified performance through simulation
- Practical implementation of the amplifier in the laboratory (in progress)

Embedded System Project - Arduino

- Developed an embedded system using the Arduino platform
- Programmed and controlled hardware components using C/C++
- Integrated sensors and electronic components into a functional project

RELEVANT COURSEWORK

- Analog Integrated Circuits
- Digital Integrated Circuits
- Signals and Systems
- Electronic Devices
- Databases
- Computer Programming and Programming Languages

WORK EXPERIENCE

Event Technical Crew – ASC Event Production

- Assisted in the setup and installation of lighting systems and sound equipment for large-scale events and festivals.
- Worked with stage lighting, speakers, and audio systems, ensuring proper installation and functionality.
- Participated in the assembly and dismantling of technical equipment for concerts and festivals such as Summer Well.
- Collaborated with the technical team to ensure efficient event preparation and smooth operation during events.
- Gained hands-on experience with event production logistics, stage setup, and audio-visual equipment.

VOLUNTEERING EXPERIENCE

Volunteer – Electronics Students League (LSE)

- Active volunteer since the first year of university, contributing to the organization and coordination of major student and international events.
- Supported the planning and execution of RoboChallenge, an international robotics competition with participants from over 30 countries, assisting with logistics, technical setup, and event operations.
- Contributed to the organization of LAN Party, the largest student esports competition, helping manage event logistics, participant coordination, and technical infrastructure.
- Assisted in the setup and coordination of technical equipment, event spaces, and participant areas, ensuring smooth event flow.
- Collaborated with team members to handle on-site problem solving, participant support, and event management under dynamic conditions.
